

# Improving Care: Examining Issues in Medication Delivery

Case	Challenge	Strategy	Solution
------	-----------	----------	----------

**SHAPE Vaccine Delivery:**  
A coalition of vaccine experts across the entire vaccine community (national and state government agencies, advocacy groups, clinicians, distributors, and manufacturers

Vaccines are one of the most successful public health endeavors; however, there has not been a critical look at the fidelity of the vaccine delivery process (from shipping to shots)

Vaccine 32 (2014) 2389–2393

Raised the discourse to focus on continuous process improvement (CPI) in vaccine delivery

Engage the vaccine community to evaluate the need and means to address continuous process improvement (CPI) in vaccine delivery

**Result:** Created an ad hoc body comprised of all vaccine stakeholders and convened 3 national and 2 regional meetings with publication of findings and plans to formalize the effort
